Message from the Guest Editors

Dear Colleagues,

Sustainability economics addresses the issue of growth by promoting the broader concept of economic development that takes into account the environmental and sociospatial impacts of economic activities. Achieving sustainable development means that business and industry will have to adjust production processes and operational structures towards reducing their environmental footprint (pollution, energy consumption, etc.) while increasing their socioeconomic contribution in local communities and regional prosperity. In this context, this Special Issue, starting from the premise that the overall goals of economic development and environmental conservation are not conflicting but mutually reinforcing, will comprise selected cross-disciplinary papers on innovative business practices and models of sustainable development and their environmental/social/economic impact as well as national/regional/industrial policies supporting and enhancing sustainable development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2020).
